

The up-grade of CM/ECF includes new functionality for filing events that have restricted access for either the docket entry, the document (PDF) or both. To better describe these changes the following chart lists the events available for attorneys to use to file restricted access documents and the restrictions that are applicable to each. These restrictions will only be effective for documents filed on or after October 2, 2006.

Note: All attorney filings automatically generate a Notice of Electronic Filing to the court.

EVENT	RESTRICTIONS
